Project/Thesis Proposal Management System

Presented by
Ashfia Khatun
Dept. of ITM
3rd Batch
ID: 211 51 038

Supervised by
Ms. Nusrat Jahan
Assistant Professor
Head of the ITM Dept, DIU

Background

Overview of current challenges:

- Overloaded email inboxes.
- Risk of losing proposals.
- Lack of centralized supervisor tracking.

Objective

- Streamline proposal submission.
- Centralized document management.
- Automated supervisor assignment.
- Enhance communication and transparency.
- Secure data storage and retrieval.

Expected Outcomes

- Fully functional web application.
- Centralized repository for proposals.
- Automated tracking of supervisor assignments.
- Transparent workflows and enhanced communication.

Features

- **Student Portal:** Proposal submission and feedback tracking.
- **Teacher Portal:** Proposal review and provide feedback.
- **Admin Portal:** Manage users, departments, reports, and supervisor assignment.
- Real-time email notifications and status updates.

Functional Requirements

01 User Authentication & Authorization

02 User Management

03 Department Segmentation

04 Project/Thesis Proposal Submission

05 Admin and Supervisor Management

06 Feedback Mechanism

07 Document Management

08 Search and Filter

09 Reporting

10 Notifications

11 Audit Trial

Non-functional Requirements

01 **Scalability:** Ensure system handles growing users and data as university expands.

02 **Response Time:** Optimize for quick user actions like proposal submission and search.

03 **Security:** Implement data encryption and strong user authentication.

04 **Usability:** Design an intuitive, accessible interface following WCAG (Perceivable, Operable, Understandable and Robust) standards.

05 **Reliability:** Aim for high availability, regular backups, and disaster recovery.

06 **Maintainability:** Use modular codebase and provide comprehensive documentation.

Stakeholders

01 **Super Admin:** Manages the entire system, including user management, department configuration, and maintenance.

02 **Admin (Advisor):** Oversees department-specific user accounts, manages the proposal submission process and approves or rejects proposals.

03 **Supervisor (Teacher):** Reviews, and provides guidance and feedback to students.

04 **Students:** Submit proposals, track their status, and receive feedback from supervisors.

System Architecture

01 **Frontend:** Laravel Blade templates, Bootstrap, and JavaScript

02 **Backend:** PHP, Laravel

03 **Database:** MySQL, XAMPP Server

04 **Hosting:** XAMPP during development, scalable AWS deployment.
